

CRISTINA GARMENDIA MENDIZÁBAL

PhD in Biology from the Universidad Autónoma of Madrid and MBA from the IESE Business School.

She was the Minister of Science and Innovation for the Spanish Government throughout the IX Legislature. After leaving the Government, she resumed her responsibilities in the companies that she founded, Ysios and Genetrix, and also presides over the Spanish-American Satlantis Microsats and the listed Spanish-German biotechnological company Expedeon.

She is president of the COTEC Foundation and is part of various advisory councils, university and business administration councils. She is a consultant to the European Commission as a member of the High Level Group (HLG), which has formulated the recommendations for the design of the IX Framework Program (2021-2026) of the European Union. Her work and entrepreneurial vision has been recognized on several occasions with awards for research and business innovation.
